

INTERIOR PANELS

Think Trespa

TRESPA®

IF YOU ARE LOOKING FOR UNIQUE SURFACE PROPERTIES, THINK TRESPA

As the leading producer of world-class architectural materials, Trespa International produces a range of functional panels for demanding interior applications: Trespa Virtuon. These panels deliver exceptional performance in terms of hygiene, cleanliness and design.

The importance of hygiene has long been recognised by designers and users of demanding interiors. The rising cost of cleaning drives the need for surface materials that can be cleaned fast and effectively and do not support bacterial growth. In addition, these materials need to be durable, environmentally sound and help to create a pleasant and attractive interior.

Trespa Virtuon

Trespa Virtuon has established a reputation for quality and durability. Impact and moisture resistant Trespa Virtuon combines the durability of HPL Compact panels with a closed, impermeable surface which is easy to clean and resistant to cleaning agents and disinfectants. Trespa Virtuon panels are manufactured using a proprietary EBC process, producing a surface that can be maintained with minimum effort - keeping panels free of stains and blemishes for many years, even in the most challenging environments. Moreover, Trespa Virtuon offers a wide range of design possibilities with its extensive range of colours, metallic finishes and textures.

Proven effectiveness

Literally thousands of architects and interior designers around the world have already experienced how these panels can help them to create living environments that combine striking aesthetics and long-lasting visual impact with exceptionally high levels of hygiene in environments where bacteria and dirt pose a real threat. From hospitals to healthcare facilities, from transport terminals to sports centres and from retail outlets to museums, Trespa Virtuon has proven effectiveness in maintaining a healthy

environment.

Clean, fast and safe

Practical experience is important – so are test results. Trespa Virtuon has been subjected to a range of tests by renowned institutes. Their conclusion: thanks to its closed surface, Trespa Virtuon is easy to clean and disinfect. To underline its effectiveness, Trespa Virtuon carries a product guarantee of 10 years on impact resistance, moisture resistance and cleanability.

Using Trespa's proprietary installation system TS-2000, Trespa Virtuon can be installed easily and quickly, saving time and resources. In addition, the panels have an excellent environmental profile, having been manufactured to standard ISO 14001 – and come complete with Life Cycle Analysis (LCA) reports.

These microscopic pictures of the urethane-acrylic surface of Trespa Virtuon show that there is no difference between fresh material and material with which 10 years of aggressive cleaning is simulated.

MADE FOR FREQUENT CLEANING

In demanding environments, regular and frequent cleaning continues to deliver the highest levels of hygiene. So ease of cleaning is a key requirement – and here Trespa Virtuon delivers significant benefits. When compared to other frequently used surface materials, the use of Trespa Virtuon allows for substantial savings on cleaning efforts.

- > Low dirt pick up due to the smoothness of Virtuon's urethane-acrylic surfaces.
- > Surfaces can be cleaned effectively, with more aggressive cleaning agents resulting in removal of a larger part of the contamination.
- > High cleaning efficiency: switches and control panels can be slotted into the Trespa surfaces and connections with the floor can be made flush.
- > Due to optimum sheet sizes the number of joints is limited and several hygienic and durable joint solutions are available.
- > Trespa Virtuon will retain its good looks for many years despite frequent cleaning.

Koch + Partners, Architekten und Stadtplaner, Germany

Architectenburo Cepezed, The Netherlands

RESISTANT TO BACTERIA

No need for anti-microbial additives. Trespa Virtuon has its anti bacterial properties incorporated in the product without the use of anti-microbial additives. This means that these properties will remain active throughout the product's lifetime.

- > The smooth and non-porous surfaces of Trespa Virtuon do not support growth of micro-organisms. Bacteria stains will dry relatively fast on the surface – and bacteria will not find any source of nutrition on the material.
- > Hygiene properties of Trespa Virtuon remain the same under extreme conditions.
- > Different types of joint closures for Trespa Virtuon wall lining panels were successfully tested for their hygiene properties.

* Tested by using the Japanese Industrial Standard JIS Z 2801: 2000.

A WELL-DESIGNED ENVIRONMENT

Trespa Virtuon provides architects, designers and installers with an excellent combination of brilliant colours and textures as well as special effects such as metallic colours. These help to create an interior that is both highly individual and exceptionally functional: by applying form and colour, Trespa Virtuon makes it possible to incorporate identity in the design.

Trespa Virtuon panels have an integrated decorative surface that is smooth, impermeable and impact resistant, with a unique brilliance and long-lasting aesthetic appeal - making it ideal for intensive use over a prolonged period of time. Trespa Virtuon is easy to clean so that it will keep its good looks for many years.

Easy installation

Whilst design is important, installation too plays a key role. Trespa Virtuon can be easily machined and installed in many different ways. It is possible to create large surfaces with minimal jointing. This creates openness and underlines transparency. Switches and control panels can be slotted into the Trespa surfaces and connections with the floor can be made flush for high cleaning efficiency; with optimal sheet sizes the number of joints is limited and several hygienic and durable joint solutions are available.

Trespa Virtuon enables the user to create an interior with a personal touch – with the right atmosphere and the desired degree of comfort.

Trespa International B.V.

Trespa International B.V. specialises in high quality panel material for façade cladding and interior use. Trespa has both the expertise and the means to develop products for specific segments of the market. Trespa is continually looking for ways to protect the environment even more effectively.

Trespa guarantees quality of both products and services. We offer our customers optimal technical support as well as straightforward documentation. Proof of this approach is the award of the ISO 9001 and ISO 14001 certificates.

Conditions of Sale

To all our offers, quotations, sales, deliveries and supplies and/or agreements, and to all related services and activities the Trespa International B.V. General Conditions of Sale apply, filed at the Venlo Chamber of Commerce on 11 April 2007, registered under number

24270677, and appearing on the website at www.trespa.com. The text of these General Terms and Conditions will be sent to you upon request.

UNLIMITED POSSIBILITIES

COLOUR COLLECTION

DESIGN FREEDOM

Beauty thrives best in freedom. For a designer this means having the freedom to make choices. The choice to distinguish themselves without losing sight of the room's functions and its users. The choice to add emotion to designs, in all honesty. Design freedom is one of the principles on which Trespa bases its collection. Sources of inspiration pointing the way without posing any restrictions. Offering possibilities without marking boundaries. Trespa calls these sources of inspiration Perspectives. A platform where users' requirements and designers' ideas come together.

TRE|SPA®

Arch. Mr. Carlos Francesch de Herralde, Spain

Arch. Corgan Associates, Inc., United States

An interior reflects the identity of its users; good interiors are distinguished by a tactile identity. With its freedom of form and colour, Trespa offers numerous opportunities to add identity to a design.

Making a distinction

An interior has to grow along with human needs. Interaction with its users requires a certain flexibility of the interior. Trespa creates dynamics in a room with materials creating the right atmosphere and ensuring that the environment is enjoyed with pleasure.

Every interior is an expression of a vision. The better this vision can be expressed, the more successful the interior will be. Trespa can easily be machined and installed, and in many different ways. Enabling you to create an interior that has your personal touch.

Showing
emotions

Pure materials in pure applications create a feeling of natural tranquillity and a perception of space. The large surfaces which can be created with Trespa underline this openness and create transparency with minimal jointing.
